EDUCATION

Université de Montréal

BSc Computer Science

Montreal, QC

Aug. 2026 – Dec. 2028

Cégep Ahuntsic

DEC in Computer Science Techniques (Web & Mobile)

Montreal, QC

May 2026

EXPERIENCE

Manulife Wealth

Software Developer Intern

Montreal, QC

March – May 2026

- Built a production full-stack website for a Senior Investment Advisor at Diligence Wealth Management (Next.js, TypeScript, React, Tailwind CSS); delivered end-to-end as sole developer in direct partnership with the advisory team
- Automated data processing pipelines with Python scripts, reducing manual entry from hours to minutes; built and deployed custom Chrome extensions adopted by the full advisor team

Careforall.org

Director of Technology

Montreal, QC

March 2026 – Present

- Own all technical operations for a non-profit: implemented on-page SEO across all site pages and configured Google Search Console from scratch – first SEO implementation in the organization's history; hardened site security and improved email deliverability
- Architecting migration from legacy WordPress to a modern tech stack

Cégep Ahuntsic

Programming Tutor

Montreal, QC

May 2025 – Present

- Selected as one of 4 students chosen by the college to tutor peers; tutored 15+ students in Java, Python, JavaScript, SQL, Swift, and Kotlin; 85% of students improved their passing rate; coached on Git, CI/CD, and TDD

PROJECTS

RCapsule – AI-Powered Wardrobe Management | [GitHub](#) | [Demo](#)

Sept. 2025 – Present

Next.js, Supabase, AWS Lambda (Docker/ECR), OpenAI API, Vercel

- Designed a serverless ML pipeline with containerized AWS Lambda (ECR) executing ONNX background-removal models; applied provisioned concurrency and layer optimization to reduce cold start latency
- Reduced manual wardrobe entry by 90% via a Chrome extension scraping 10+ e-commerce sites; integrated OpenAI and live weather data for context-aware outfit recommendations

ArXiv RAG Research Assistant | [GitHub](#) | [Demo](#)

Jan. 2026 – Present

Python, Supabase (pgvector), Google Gemini API, GitHub Actions, Streamlit

- Built a serverless ETL pipeline via GitHub Actions (weekly cron) fetching ArXiv papers, extracting PDF text, and ingesting chunks into Supabase pgvector with idempotency checks
- Implemented semantic embedding search with cosine similarity and an agentic Google Gemini router that classifies query intent before retrieval, improving relevance over keyword-only search

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, C#, Swift, Kotlin, HTML5/CSS3

Frontend: React, Next.js, Vue.js, Tailwind CSS, SwiftUI, Jetpack Compose, Framer Motion

Backend: Node.js, Express.js, Spring Boot, ASP.NET, RESTful APIs, JWT, OAuth

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Prisma ORM, pgvector

Cloud / DevOps: AWS (Lambda, ECR, API Gateway), Docker, Vercel, GitHub Actions, CI/CD

Tools / Methods: Git, Postman, Linux, Agile/Scrum, TDD, Stripe, OpenAI API
